Good Morning Team—

Below are the next set of approved to cancel grants. \$42,261,933 total in remaining funds it looks like, but OMS can confirm.

One flag I have is the first few large ones are the EJ Thriving Communities Technical Assistance Centers (TCTACs)—<https://www.epa.gov/environmentaljustice/environmental-justice-thriving-communities-technical-assistance-centers>. There were 18 in total established, so a number of them are missed here. Not sure why they didn't all get captured (they may not have all gone out yet), but I would want to apply a broad approach and cancel them all in the vein the entire program is inconsistent with Administration priorities and I personally do not see the need for these because at the state-level, EPA and the TCTAC grantees refused to engage with the state in any kind of coordination. This should result in a larger \$\$ amount.

I can flag for OMS separately too that we want the cancellation to extend to every TCTAC grantee.

On the 2/13 grants reviewed, can you add the remaining amount of the grant? That would be helpful to see that information moving forward like it was presented on the 2/11 grants.

Hope to have another set (contracts and grants) coming y'all's way soon.

Thank you for this update Travis.

As a note: OMS is giving input on whether they think any given contract is mission-critical, and they didn't mark any of these contracts as mission-critical.

OMS is now moving forwards with terminating these contracts.

Hi everyone,

Keeping up the cadence today, we have added to the queue a list of 71 grants that were all signed before July 1, 2024, worth \$119M (ceiling; savings will be lower once we subtract obligations). The new tab is called "Feb 13 grants to cancel".

It was great to put 5 of the "[gold bars](#)" on this list, that are signed before July 1! (The majority of those were signed after July 1.) We have marked those 5 rows in blue, because gold is too hard to read. Total award value for those 5 is \$36.9M, of which \$27.8M has not yet been obligated. We are calling them "gold bars" because they were awards to grant makers who plan to give subawards. 4 of the 5 are part of the [Thriving communities](#) grantmaking program that Lee cancelled part of earlier today.

Best,  
Kathryn

I have added a column "T&C" that indicates no notice and comment period required for the contracts and grants we already sent you. As you can imagine, the DOGE team has lawyers that are pretty experienced with grant and contract cancellation at this point, so that's what that is based on!

I will also add that the careers in EPA OMS are already supporting us on this – they are the ones who will be executing the cancellation on your greenlight, not us. They see no issues with cancelling the Feb 11 list of contracts, and we're sharing the Feb 12 list with them now. They seem very knowledgeable about this topic, so I think you should trust them on how to cancel properly!

Thank you so much! This is really helpful. Paige and I had a good discussion with the Administrator last night reviewing the examples and process. One aspect he raised that we just want to ensure we are covering when taking the action to cancel that we are doing it reflective of any terms/conditions/notification requirements in the contract or grant. Is that something y'all feel you are able to capture in your review or we can engage OMS to quickly get us that details.

Otherwise he liked the process and agrees that we'll be able to quickly move through reviewing these once that element is addressed.

Sorry again to add one more aspect, but with that I believe we'll be able to cover all the elements requested by the Administrator.

**Subject:** RE: Loving, Kathryn shared "contract\_details" with you

Hi all, thank you so much for taking a look at the Feb 11 contracts last night! I moved the rows that were more controversial over to the "contracts to review" tab. (e.g. if Paige flagged.) The careers are ready to hit cancel on the rest, pending a green light from you all!

In addition, we added a new tab "Feb 12 contracts to cancel" with a new tranche of contracts we found today. We'd love your review on those as well.

Similar story for the grants – the grants that Paige flagged are moved over to “grants for further review”. They are all under 2 grant programs EPA has already halted, and were all signed prior to July 1, 2024, so we think they will be straightforward to cancel once you give a green light. We did not add any new grants today; maybe tomorrow 😊

And in all tabs there is now a “reason” column to justify cancellation.

Best,  
Kathryn

**Loving, Kathryn invited you to edit a file**

Hi Travis, as we discussed today, here's a list of contracts and grants that we want to push forward to cancellation, and keep the momentum going! We removed the ones we thought were yellow flags, so we think these are pretty uncontroversial, but we added a column "AO reviewed", for your team to add any greenlight or flags.

Thanks!  
Kathryn

During the month-long mission, scientists will take samples of water, sediment, and lower food-web organisms in each of the Great Lakes. Data from the survey is critical for EPA and partnering agencies to evaluate overall water quality and the health of the lower food web on a whole-lake scale. The spring survey, conducted when the water is relatively cold and well-mixed, serves as a baseline to compare against the summer survey which is conducted when the water is warmer and more stratified. This critical dataset extends back more than forty years when EPA began monitoring the Great Lakes in 1983.

## Office of Chemical Safety and Pollution Prevention (OCSP)

### Hot Topics

- On **April 1-4**, EPA will hold the agency's Science Advisory Committee on Chemicals (SACC) meeting on the draft risk evaluation for 1,3-butadiene. EPA is specifically seeking SACC review of its analyses and methodologies relevant to hazard and exposure methodologies that have not been previously peer reviewed. Nancy Beck gave brief opening remarks on **April 1**. (OCSP POC: [ [HYPERLINK "mailto:beck.nancy@epa.gov" \h](mailto:beck.nancy@epa.gov) ])
- As early as the week of **March 31**, EPA will announce improvements to simplify the process for companies submitting data to the agency as part of a pesticide registration package. Companies are required to submit a document called a "data matrix" form when their pesticide registration packages contain cited data from outside sources. Currently, companies must submit two versions of the data matrix form (in either paper or electronic format): one for internal agency use and one with reference data redacted for public use. However, in the interest of reducing burden, and because nothing on the form is Confidential Business Information, the agency determined that there is no need for a redacted version and will now only ask for one unredacted version of the form, to be used for both internal and public use. Additionally, EPA will no longer accept paper submissions of this form and will only accept this information via a web-based portal. This improvement will make the agency's processing of this information more efficient. Streamlining this process, while partnering with industry to safeguard human health and the environment, reduces burden for both companies and EPA, supporting the Administrator's Pillar Three to advance permitting reform, cooperative federalism, and cross-agency partnership. (FRL-8944-02-OCSP). (OCSP POC: [ [HYPERLINK "mailto:beck.nancy@epa.gov" \h](mailto:beck.nancy@epa.gov) ])
- As early as the week of **April 7**, EPA will share the U.S. Fish and Wildlife Service's (FWS) final biological opinion for carbaryl and implement measures from the National Marine Fisheries Services (NMFS) to protect federally threatened or endangered (listed) species and their designated critical habitats. Carbaryl is a pesticide used on a variety of crops, including field vegetables and orchard crops. EPA determined in its 2021 biological evaluation for carbaryl that use of the pesticide according to label instructions was "likely to adversely affect" at least one of the listed species and critical habitats. EPA worked with the FWS and NMFS to identify measures to mitigate carbaryl's effects to these species and their habitats. These measures include buffer zones between off-field habitats and application areas, runoff reduction measures, and application restrictions during certain crop blooms. EPA will approve new carbaryl product labels reflecting these measures and issue additional Endangered Species Protection Bulletins that set geographical limitations on carbaryl use. - OEJECR's Conflict Prevention and Resolution Center (CPRC) is providing collaboration and conflict resolution support at or adjacent to three locations that the Administrator has visited in the past three weeks: St. Louis County, MO (St. Louis Airport Superfund Site (SLAPS)/Coldwater Creek), Red Hill Bulk Fuel Storage Facility in Hawai'i, and the Motorola (52nd Street Plant) Superfund Site in Phoenix, AZ. At each of these locations, CPRC is providing expert collaboration and conflict resolution resources to support and enhance the important work of EPA staff in these locations. CPRC's services help to ensure that EPA is soliciting input from the public and help to strengthen relationships between EPA and state partners; industry; Tribes; and members of the public affected by contaminated air, land, and water.
- CPRC has received a high volume of training requests since recently advertising our upcoming trainings on EPA's intranet site. Registration for trainings in March and April closed within days of opening because they were full; a training on **March 25** had a waitlist of 12 people, and the waitlist for CPRC's training, Negotiate Better: An Interest-Based Approach, is currently 92 people. CPRC plans to offer two trainings most months to try to meet this demand.

The court found that the Fifth Circuit is the appropriate venue for the challenges. As for Mississippi, the court held that EPA's disapproval was arbitrary and capricious. The court found that EPA failed to recognize that for Mississippi, the use of updated data was entirely outcome determinative, and that EPA did not reasonably explain its decision to rely on the updated data.
